

a native interface style of an operating environment of the separate apparatus that is different than the operating environment of the apparatus.

**[0100]** In at least one example embodiment, the operating environment of the apparatus relates to an operating system of the apparatus and the native interface style relates to a native interface style of the operating system.

**[0101]** In at least one example embodiment, a native interface style relates to at least one stylistic aspect of the interface style of the operating environment.

**[0102]** In at least one example embodiment, the stylistic aspect relates to an aspect of the interface style of the operating environment that is non-configurable by way of a setting of the operating environment.

**[0103]** In at least one example embodiment, the stylistic aspect relates to at least one interactive stylistic aspect.

**[0104]** In at least one example embodiment, the interactive stylistic aspect relates to a presentation stylistic aspect.

**[0105]** In at least one example embodiment, the interactive stylistic aspect relates to a program icon stylistic aspect.

**[0106]** In at least one example embodiment, the program icon stylistic aspect relates to at least one of icon shape, icon color palette, or icon border.

**[0107]** In at least one example embodiment, the program icon stylistic aspect relates to a program icon size variability aspect.

**[0108]** In at least one example embodiment, the program icon size variability aspect relates to an aspect that governs availability of a non-stylistic setting that governs size of a particular program icon.

**[0109]** In at least one example embodiment, the program icon stylistic aspect relates to a program icon notification presentation aspect.

**[0110]** In at least one example embodiment, the icon notification presentation aspect relates to preclusion of a program icon from representing information indicative of a notification associated with a program represented by the program icon.

**[0111]** In at least one example embodiment, the icon notification presentation aspect relates to inclusion of a notification count by a program icon, the notification count being indicative of a number of notification associated with a program represented by the program icon.

**[0112]** In at least one example embodiment, the icon notification aspect relates to inclusion of a notification count by a program icon absent a representation of content of a notification associated with a program represented by the program icon.

**[0113]** In at least one example embodiment, the icon notification aspect relates to inclusion of a representation of content of a notification associated with a program represented by the program icon.

**[0114]** In at least one example embodiment, the presentation stylistic aspect relates to an animation stylistic aspect.

**[0115]** In at least one example embodiment, the animation stylistic aspect governs one or more animations associated with one or more events in the operating environment.

**[0116]** In at least one example embodiment, the animation stylistic aspect governs a scroll animation.

**[0117]** In at least one example embodiment, the animation stylistic aspect governs presence of a bounce animation to signify a scroll endpoint.

**[0118]** In at least one example embodiment, the animation stylistic aspect governs a program open animation.

**[0119]** In at least one example embodiment, the animation stylistic aspect governs a program close animation.

**[0120]** In at least one example embodiment, the presentation stylistic aspect relates to a selection item aspect.

**[0121]** In at least one example embodiment, the selection item aspect governs a manner in which a selectable interface item is represented to a user.

**[0122]** In at least one example embodiment, the selection item aspect governs a radio button representation aspect.

**[0123]** In at least one example embodiment, the radio button representation aspect relates to an interface element that provides for selection of one of a set of enumerated options.

**[0124]** In at least one example embodiment, the radio button representation aspect relates to a selectable button representation.

**[0125]** In at least one example embodiment, the radio button representation aspect relates to a selectable enclosure representation.

**[0126]** In at least one example embodiment, the selectable enclosure representation relates to at least one of a selectable box or a selectable circle.

**[0127]** In at least one example embodiment, the selection item aspect governs a binary selection aspect.

**[0128]** In at least one example embodiment, the binary selection aspect relates to an interface element that provides for selection of one of two enumerated options.

**[0129]** In at least one example embodiment, the binary selection aspect relates to a slider interface element.

**[0130]** In at least one example embodiment, the binary selection aspect relates to a selectable toggle button representation.

**[0131]** In at least one example embodiment, the selection item aspect relates to a numeric selection aspect.

**[0132]** In at least one example embodiment, the numeric selection aspect relates to an interface element that provides for selection of a numerical value.

**[0133]** In at least one example embodiment, the numeric selection aspect relates to a slider interface element.

**[0134]** In at least one example embodiment, the numeric selection aspect relates to a scrollable set of selectable numeric enumerations.

**[0135]** In at least one example embodiment, the numeric selection aspect relates to a text entry interface element.

**[0136]** In at least one example embodiment, the interactive stylistic aspect relates to a navigation stylistic aspect.

**[0137]** In at least one example embodiment, the navigation stylistic aspect relates to a manner in which transition from a screen to a different screen is provided for.

**[0138]** In at least one example embodiment, the navigation stylistic aspect relates to a tabbed navigation aspect.

**[0139]** In at least one example embodiment, the tabbed navigation aspect relates to provision of a plurality of selectable tabs that govern a screen to be provided in response to selection of a selectable tab.

**[0140]** In at least one example embodiment, the navigation stylistic aspect relates to a virtual screen adjacency navigation aspect.

**[0141]** In at least one example embodiment, the virtual screen adjacency navigation aspect relates to provision of virtual screens such that panning beyond a boundary of a virtual screen causes transition to a different virtual screen.

**[0142]** In at least one example embodiment, the interactive stylistic aspect relates to a lock screen aspect.
